Change Log:
FaxGwise Server 6.0.33

Changes

- The GUI for Injobs and Outjobs was improved. The list view is stable and does not change after updating.

- SMTP notifications are fixed and work properly.

- The server logic for the communicator connection is improved. When loosing the connection, the server does not stop but continues to work. The administrator receives notifications until the connection is restored.

Bugfix

- View-Search is available in the In-jobs folder.

- Incomminc faxes in TIFF format can be viewed in the In-jobs folder.

- The red border around the communicator icon disappears when the connection with communicator is restored.

- The issue with insufficient field size is solved.

- Umlauts are recognized now by the server.

- Outjob and Injob forms are stable.

- The "Send again" options works properly.
